Become a Certified Medical Coder

Medical coding is quickly becoming a vital role in providing and billing of medical services in the Kingdom of Saudi Arabia. As the medical coding industry grows, the need for skilled and certified professionals to fill clinical coding roles is increasing. To help meet this need, AAPC is providing a national training and certification program accredited by the Council for Health Insurance (CHI).

The Clinical Coding Professional Certification (CCP-KSA) is a comprehensive course designed to prepare medical coders with the specific jobs skills and knowledge necessary to be successful in basic medical coding for both inpatient and outpatient settings within the Saudi Arabia healthcare market.

Upon completing the course, coders will also be prepared to challenge the certification exam administered by AAPC. Successfully passing this exam you will earn the professional credential and be recognized internationally as a certified Clinical Coding Professional (CCP).

Overview

The CCP-KSA course encompasses the Saudi Arabia coding and billing standards as specified by each of the key regulatory bodies including the Ministry of Health (MOH), Saudi Health Council (SHC), Saudi Commission for Health Specialties (SCFHS), Council of Health Insurance (CHI) and SFDA (Saudi Food and Drug Authority)

You will learn to translate services and diagnosis using the correct application of ICD-10-AM diagnosis codes, Saudi Billing System (SBS) procedure coding classification and billing standards, and AR-DRG for coding and billing of medical claims in the outpatient setting and admitted care (inpatient and day cases).

The course is designed for both individuals new to clinical coding and those already working in the coding industry that wish to deepen their skills and obtain a professional certification. It is also relevant for both the private and public sectors.

Program Details

The course consists of 19 modules designed to provide students with the competencies needed to prepare and code medical services for claims processing.

Areas of competency include:

- Accurately apply coding conventions when assigning diagnoses and procedure codes for outpatient and admitted care (inpatient and day cases).
- Understand and apply the official ICD-10-AM coding guidelines.
- Provide practical application of coding outpatient and admitted care (inpatient and day cases) charts.
- Understand Saudi Health Insurance system and regulatory requirements.
- Understand and applying data requirements for MOH-MDS (ministry of health minimum data specifications).
- Understand and apply the SFDA, GMDN and GTIN coding classifications for pharmaceuticals and medical devices.
- Understand and apply the Australian dental association (ADA) coding classification.
- Understand and apply KSA service, ambulatory transport, lab and pathology coding classifications.
- Understand related medical terminology and anatomy.
- Identifying inconsistencies in clinical documentation and ways to improve.
- Coding competency for a wide variety of patient services using Saudi billing system procedure classification and coding standards, ICD-10-AM, and AR-DRG classification.

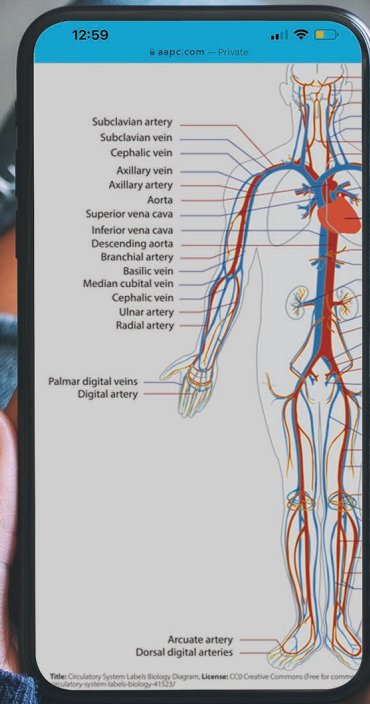

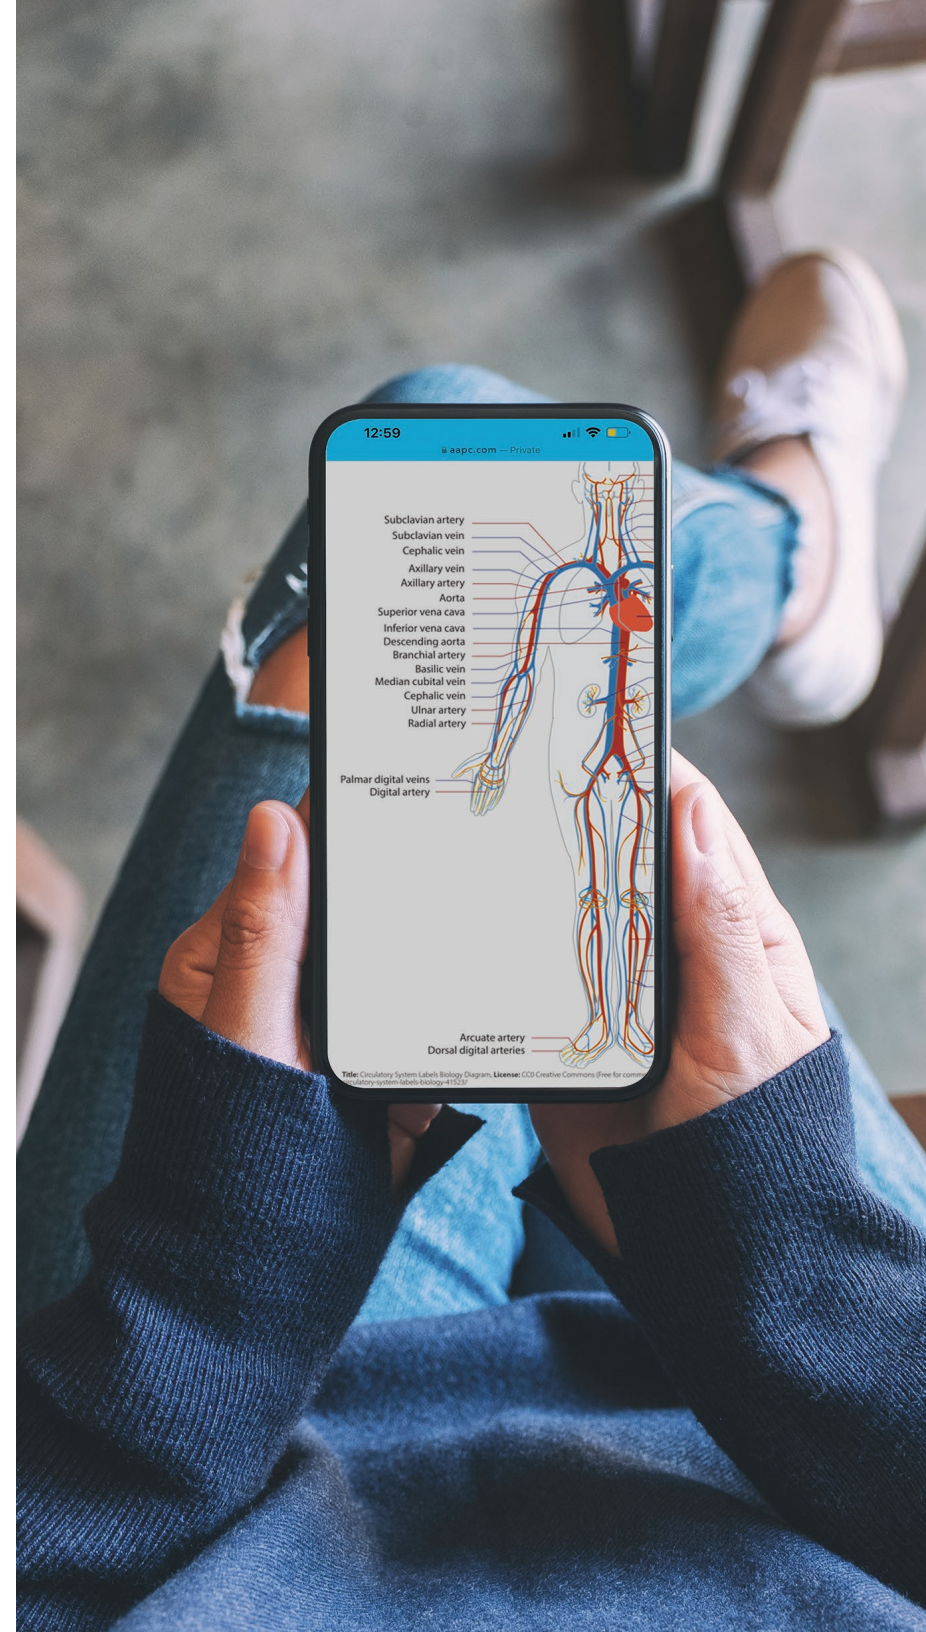

Pre-Requisites

There are no requirements for completing pre-requisite courses prior to entering the CCP-KSA program. However, it is highly recommended that participants have a strong understanding of medical terminology, Human anatomy and pathophysiology. Individuals without prior training in these areas are encouraged to complete the following course before enrolling in the CCP-KSA Program:

Fundamentals of Medicine Course (40 hours)

This is a 12-week online course. Students will learn medical terminology, anatomy, and pathophysiology for a wide range of topics, applying what is learned to reading and interpreting a medical record. This course is valuable for anyone preparing for a career in any non-clinical medical profession, and strongly recommended for anyone who is preparing for an AAPC certification examination.

For more information or to enroll please contact AAPC.

Training Options

The CCP-KSA course can be completed using one of the following training options:

Online Self-Paced Training

The online self-paced course is designed for students who want complete flexibility to follow their own schedule and study independently. AAPC coaches will be available to answer questions via email or chat.

Students have up to 12 months to complete the course.

Virtual Live Training

Students attend regularly scheduled live class sessions online where they participate in lectures and interact with the instructor and classmates virtually.

Course is 14 weeks in duration with 3-hour classes being held approximately 2 times per week.

The course is highly interactive and incorporates a variety of teaching methods designed to engage students and assess their knowledge throughout each module. These include the following:

- Chapter Lectures: Including online learning modules
- Reading Assignments: Using our study guide and course textbook
- Module Quizzes: Online quizzes after each chapter to help assess student comprehension
- Chapter Tests: Tests after each chapter designed to help prepare students for the Final Exam
- Practical Application Work Assignments: Case studies mirroring real life scenarios
- Final Exam: Final course exam to pass the course, also helps prepare students for the Certification Credential Exam

Required Materials

All students will need access to a computer and reliable high-speed internet. Students taking the live virtual course will also need a webcam.

Certification Exam

Upon completion of the training course, individuals will be allowed to challenge the CCP-KSA Certification exam. The exam is 4-hours in length and if successfully passed, students will be awarded a professional credential as a certified Clinical Coding Professional.

This internationally recognized credential is considered the gold standard in clinical coding and is recognized by governments and employers around the world.

About AAPC

With over 220,000 members in 43 countries, AAPC is the world's largest training and credentialing authority for medical coding, billing, and health information management professionals.

AAPC is recognized by governments, employers, and association groups as the gold standard in medical coding and health information management.

AAPC offers 30+ professional credentials and certifications, and each year conducts over 60,000 certification exams in 3,700 locations around the world. All of this is done with the goal of preparing working professionals with the specialized skills and expertise needed to be successful in today's complex health care system.

About ANOVA

ANOVA is one of the first Saudi licensed companies to venture into Revenue Cycle Management (RCM) services and Technology. Through careful acquisitions and hand-picked professionals, we have firmly established ourselves as the Quality reference in the industry.

As the Kingdom moves forward with vision 2030 to develop all aspects of life; healthcare takes a central role. As an entity with means and knowledge, we felt responsible for supporting this progress. Thus, ANOVA health was founded.

Healthcare is going through a transformation, and we aim to be the protagonists of it. ANOVA will be the next leading name in healthcare services, applications, and training. We are committed to leading the change in the healthcare industry in the kingdom, including the new regulation at the healthcare business and its implementations and training.

The components of our operational solutions and technologies have been carefully and strategically selected to complement and support each other as they all operate in one ecosystem. Service is coupled with technology, supported by education, training, consultations, and quality management, and integrated with financial services.
